

LifeSize 21st Century Classroom

The Challenge

Schools everywhere continue to face budget pressures and a serious shortage of teachers. Some subject areas may have only one teacher for an entire school district. Leveraging new classroom technology* is increasingly difficult, which compels districts to seek creative and affordable ways to provide popular, requisite and college prep classes on all campuses—and to give students more ways to participate in classroom learning without physically being there.

The Solution

High definition video conferencing offers an abundance of opportunities for today's tech-savvy students and educators.

- **Distance Learning:** Expand teachers' reach by streaming lessons to classrooms throughout the district...and beyond
- **Guest Lecturer:** Enlist subject matter experts to lecture live from almost anywhere
- **Virtual Field Trips:** Bring the museum, aquarium or nature hike to the classroom
- **Student Engagement:** Promote interaction with distance classes via text chat during a live classroom session
- **Remote On-Demand Viewing:** Record lessons for students who miss class to view anytime or to revisit as an exam primer
- **YouTube Channel:** Publish performances, interviews, debates, science fair presentations, student news
- **In-Service Teacher Training:** Record training for on-demand playback to keep teachers in the classroom
- **School Announcements:** Publish communications for students, teachers and parents to watch on their own time from a computer, tablet or smartphone.

LifeSize Room 220 Series Works With...

Digital notebooks
Electronic whiteboards
Projectors
Document cameras
DVD players
and more

The LifeSize 21st Century Classroom begins with:

LifeSize® UVC Video Center™

- Live streaming and recording of classroom lessons with the push of a button
