

LifeSize Physician's Emergency Consult

The Challenge

For health emergencies and rare medical conditions, rural and smaller hospitals have always struggled with access to specialists. Even among the most advanced hospital systems, experts for some medical conditions can be difficult to secure. At times, these healthcare organizations must transfer critically-ill patients, losing precious time and risking complications.

The Solution

HD video conferencing provides physicians instant face-to-face access to the best minds in medicine.

- **Call Specialists:** Seek expert advice to confirm diagnosis and treatment options
- **Share Data:** Show an MRI, ultrasound, EKG, X-ray or lab result that displays with crystal clear clarity
- **Expand Reach:** Provide patient care via video in under-served rural areas, metropolitan areas, prisons, schools and many other locations
- **Invite Subject Matter Experts (SMEs):** Capture SME presentations and stream live to anywhere in the world
- **View Anytime & Anywhere:** Record patient cases for consults and peer reviews across time zones

LifeSize Room 220 Series Works With...

Medical scopes and cameras
Mobile medical carts
Digital stethoscopes
and more
